- Working with Cascading Style sheets
- Working with Events
- Working with menus
- Working with Cursor

Java Script

- Introduction
- What is Java Script, Java "vs." JavaScript, JavaScript Comments
- JavaScript into an HTML page
- External JavaScript
- JavaScript Variables, JavaScript Operators
- JavaScript Decision Making & branching
- Alert Box, Confirm Box, Prompt Box
- JavaScript Functions

- JavaScript Loops
- The break and continue Statement
- JavaScript Events
- Catching Errors
- The try...catch Statement
- Insert Special Characters
- Object Oriented Programming
- Methods
- Properties
- JavaScript object
- Date
- String
- Array
- Math
- Boolean
- Events ,Event on Method,
- Window Browser Events
- Advanced JavaScript

JQuery

- JQuery-Overview
- JQuery-Basics
- JQuery-Selectors
- JQuery-Attributes
- JQuery-CSS
- JQuery-Events
- JQuery-Effects
- JQuery-Plugging
- JQuery –Resources

Module-II

PHP

- PHP Introduction
- PHP Basic
- How to install PHP
- Basic Syntax of PHP
- PHP Variables &Data Type

- String Handling in PHP
- Math Functions
- Date Time Function
- Utility Function
- Regular Expressions
- PHP Operators
- Decision Making & branching in PHP
- PHP Arrays
- PHP Function
- PHP Forms
- File Handling
- PHP \$Get Method
- PHP \$ Post Method
- Query String
- Server Method
- Request Method
- File Upload
- Form Action
- Form Based Query
- Form Validation
- Hidden Field
- Accessing database
- Manipulating database

Module-III

Advanced PHP

(Object Oriented Programming+ File Handling+xml)

- Include() and Require()
- State Management Functions
- Class Definition,
- Objects
- Class Constructor
- Class Inheritance
- Abstract Class
- Destructors

- Interface
- extends
- File Handling
- final class
- Properties set &get
- static properties
- create a file , File Read, File Delete ,File Copy ,File Move,
- Directory Create Delete,
- Utility Function (for file Handling)
- Cookies
- Session Management
- Header function
- Authentication (User logins)
- Authorization (Permissions)
- XML and PHP Basics
- XML File Reader
- XML File Writer
- PHP, XML and Databases
-

MYSQL

- Introduction to MySQL
- Creating MySQL Connection
- Relational Database Normalization
- Creating Database & Tables
- MySQL Queries
- Storing & Manipulating Data
- Data types in SQL
- MySQL select
- Use Where
- Use wildcards
- Use the IS NULL and IS NOT NULL keywords
- Use the ORDER BY clause
- Use the TOP keyword
- Use the DISTINCT keyword
- Use aggregate functions in queries
- Group result set

- Creating database
- Viewing database
- Deleting database
- Renaming database
- Create tables
- Insert rows into tables
- Delete tables
- Altering tables
- Maintain data in a table by using
- INSERT statement
- UPDATE statement
- DELETE statement
- Local to Live server connectivity
- backup of database etc

Module-IV-Project

Module V

Content Management System

Students can pick any CMS in this training - Wordpress, Joomla

Module-VI-2nd Project
