

Permit Management System

The scope of the project has been defined to include computerised permit generation, permit printing with pre-printed stationary, permit search and record of the various liquor quotas to be implemented (if any) among others. The Permit Management System is proposed to have a centralized database which shall reduce the problem of storing and retrieving the data. Using the system, the officers in the Excise and Taxation Department shall be able to work more efficiently by reducing the amount of file work involved in the various permit related procedures. The permit management system shall include easy permit generation utility, permit cancellation utility, a module to revalidate the permits and calculate fees dynamically among other features. Authentication as well as authorization features are to be incorporated so as to provide a high level of security to avoid any misuse of the system.

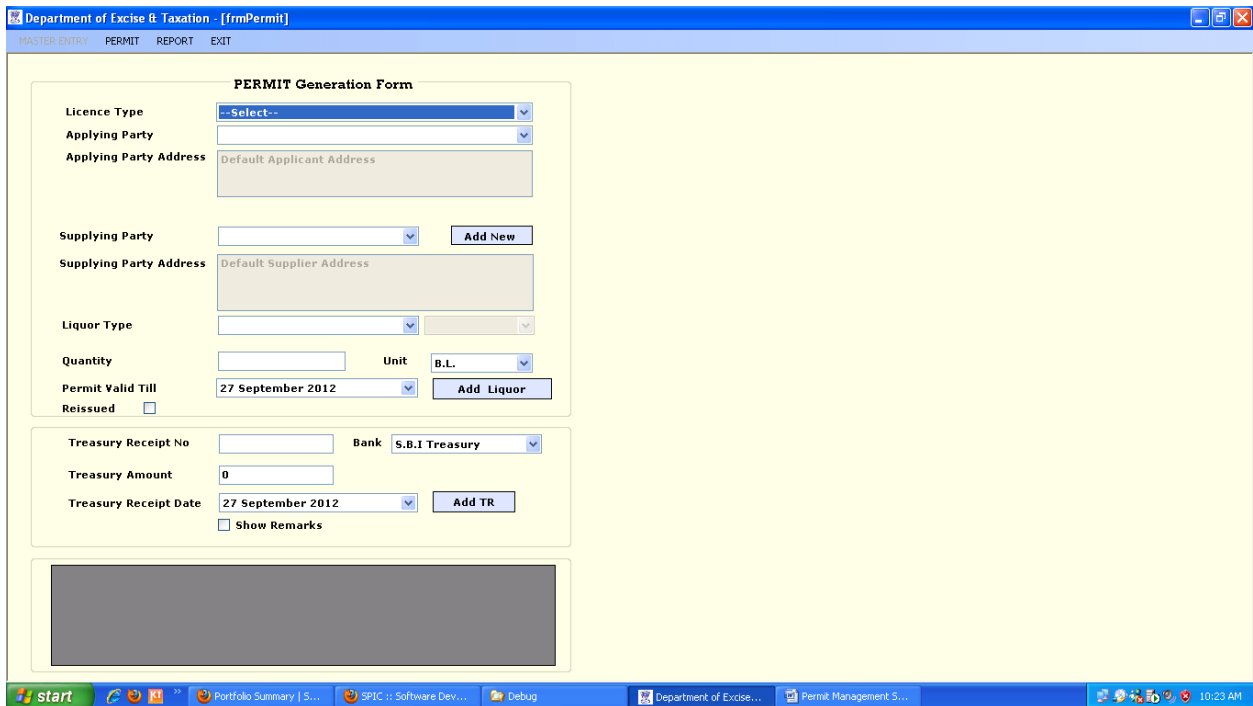

User Login screen to authenticate the user access.

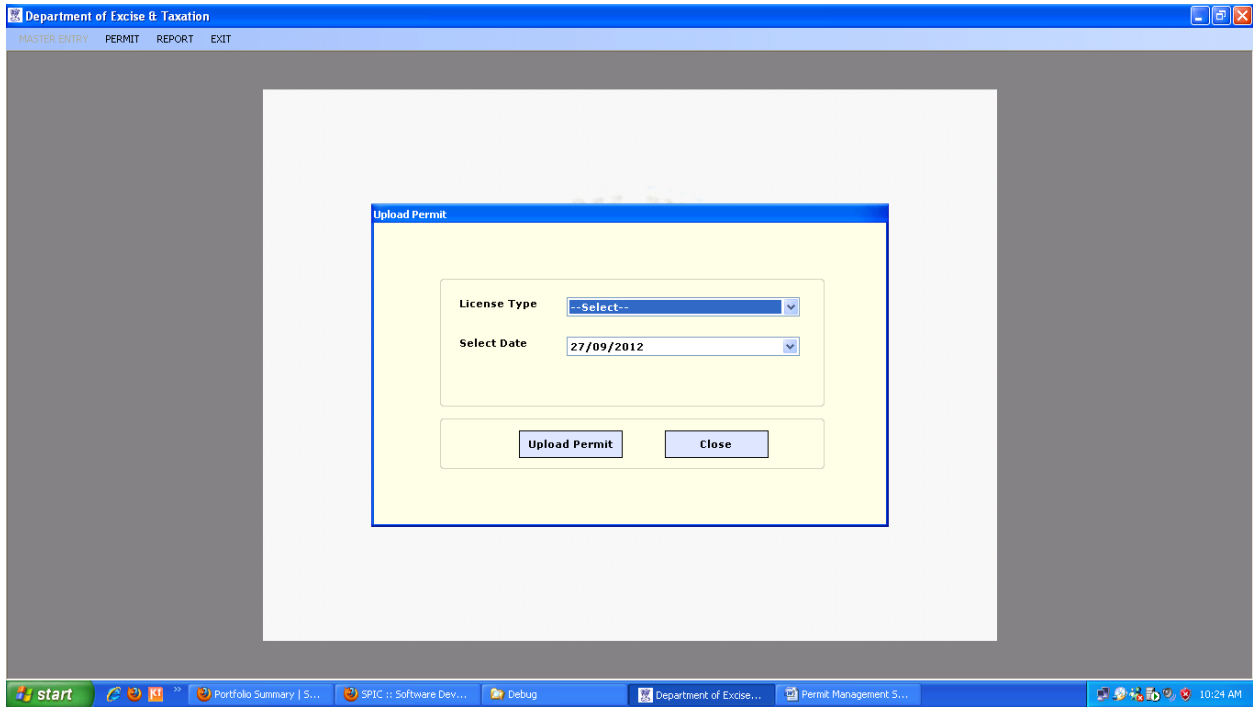

Master forms to enter Fee structure for the current financial year.

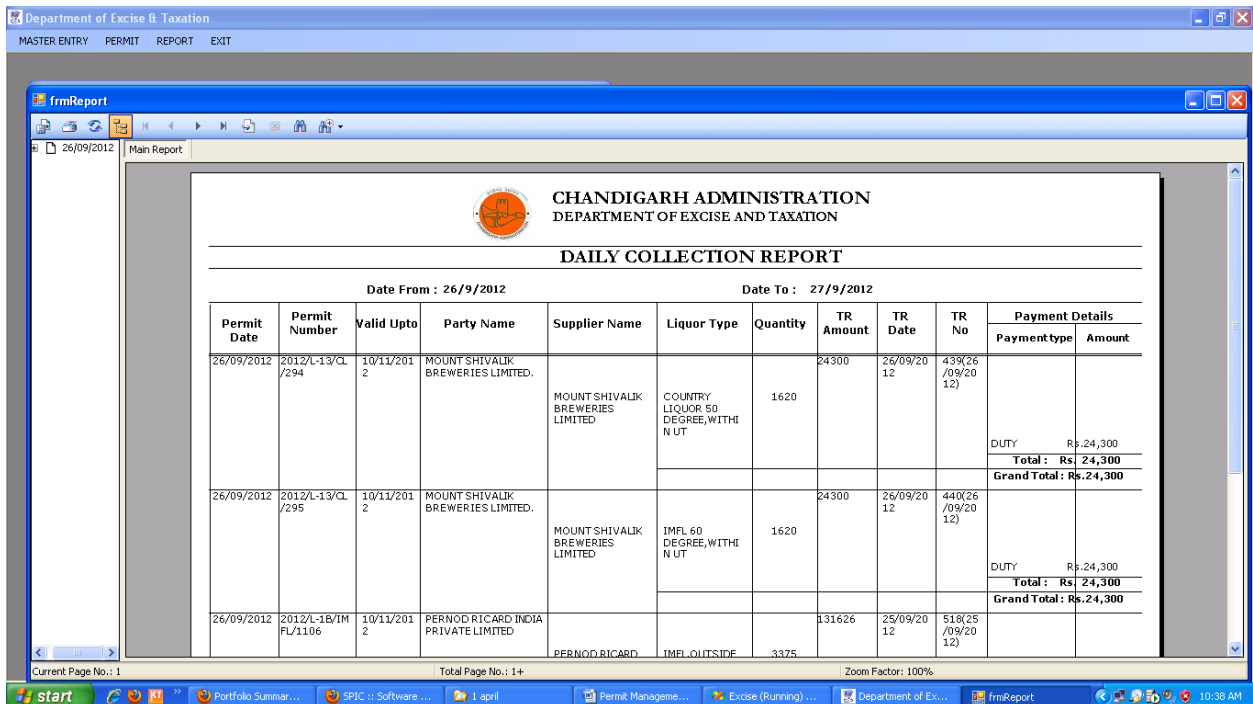

Interface to generate permit applied by the dealers.

Uploading of permit to the main server used for the application of passes.

Day wise report of the permit issued by the department

Day wise report of the amount collected against the permit issued by the department

CHANDIGARH ADMINISTRATION
DEPARTMENT OF EXCISE AND TAXATION
